

JESUS GONZALEZ

Professional Summary

I am a 20-year-old, well-experienced electronics technician working on military aircraft in the Marine Corps Reserves. As a young, hard-working individual I am ready to take on any problem and am eager to learn new things and expand my knowledge in my fields of work and study.

I am pursuing a degree in Computer Science and also enrolled in a fast-paced Coding Bootcamp learning Full Stack Web Development (MERN). As a Web Developer, I have learned and applied concepts such as HTML, CSS, Bootstrap, Javascript, ES6, JQuery, API's, Node.js, and NPM, and am still learning Express, databases such as MySQL and MongoDB., Also, React as my framework.

Employment history

Avionics Technician, United States Marine Corps. Camp Pendleton, California

Jun. 2018 – Present

I am an enlisted reservist in the USMC (E-3), I work as an Avionics Technician on the Bell AH-1Z and UH-1Y Maintaining, installing, and troubleshooting electrical components and wiring. I have a good understanding of reading schematics, using multimeters and oscilloscopes, understand electrical components and their function, aircraft systems and software, AC/DC circuits, and other electrical engineering concepts. I am experienced in testing and troubleshooting operations and contribute a lot to my team.

Warehouse Associate, Amazon.com. Eastvale, ca

Jul. 2019 – Present

As a warehouse associate at Amazon, my responsibilities are to stow, transport, and distribute products throughout the warehouse. I take responsibility for work centers, ensuring all employees have the work they need. I also am a Learning Ambassador and am tasked to training new hires on the roles of the workspace on positions like stow, run, vrc, chase, and problem solve.
